Test4–listening–part1

Questions 1–10

Complete the notes below.

Write **ONE WORD AND/OR A NUMBER** for each answer.

Advice on family visit

Accommodation

- Hotel on George Street
- cost of family room per night: 2 £ (approx.)

Recommended trips

- a tour of the city centre (starts in Carlton Square)
- a trip by to the old fort

Science Museum

- best day to visit:
- see the exhibition about , which opens soon

Food

·Clacton Market:

-good for food

-need to have lunch before p.m.

Theatre tickets

·save up to % on ticket prices at bargaintickets.com

Free activities

·Blakewell Gardens:

-Roots Music Festival

-climb Telegraph Hill to see a view of the

Test4–listening–part2

Questions 11 and 12

Choose **TWO** letters, **A–E**.

11 - 12 Which **TWO** things does the speaker say about visiting the football stadium with children?

- A. Children can get their photo taken with a football player.
- B. There is a competition for children today.
- C. Parents must stay with their children at all times.
- D. Children will need sunhats and drinks.
- E. The café has a special offer on meals for children.

Questions 13 and 14

Choose **TWO** letters, **A–E**.

13 - 14 Which **TWO** features of the stadium tour are new this year?

- A. VIP tour
- B. 360 cinema experience
- B. audio guide
- C. dressing room tour
- E. tours in other languages

Questions 15 – 20

Which event in the history of football in the UK took place in each of the following years?

Choose **SIX** answers from the box and write the correct letter, **A – H**, next to Questions 15 – 20.

15. 1870	15
16. 1874	16
17. 1875	17
18. 1877	18
19. 1878	19
20. 1880	20

Events in the history of football

- A. the introduction of pay for the players
- B. a change to the design of the goal
- C. the first use of lights for matches
- D. the introduction of goalkeepers
- E. the first international match
- F. two changes to the rules of the game
- G. the introduction of a fee for spectators
- H. an agreement on the length of a game

Test4–listening–part3

Questions 21 and 22

Choose **TWO** letters, **A–E**.

21 - 22 Which **TWO** benefits for children of learning to write did both students find surprising?

- A. improved fine motor skills
- B. improved memory
- C. improved concentration
- D. improved imagination
- E. improved spatial awareness

Questions 23 and 24

Choose **TWO** letters, **A–E**.

23 - 24 For children with dyspraxia, which **TWO** problems with handwriting do the students think are easiest to correct?

- A. not spacing letters correctly
- B. not writing in a straight line
- C. applying too much pressure when writing
- D. confusing letter shapes
- E. writing very slowly

Questions 25–30

Choose the correct letter, **A, B or C**.

Teaching handwriting

25 What does the woman say about using laptops to teach writing to children with dyslexia?

- A. Children often lack motivation to learn that way.
- B. Children become fluent relatively quickly.
- C. Children react more positively if they make a mistake.

26 When discussing whether to teach cursive or print writing, the woman thinks that

- A.cursive writing disadvantages a certain group of children.
- B.print writing is associated with lower academic performance.
- C.most teachers in the UK prefer a traditional approach to handwriting.

27 According to the students, what impact does poor handwriting have on exam performance?

- A.There is evidence to suggest grades are affected by poor handwriting.
- B.Neat handwriting is less important now than it used to be.
- C.Candidates write more slowly and produce shorter answers.

28 What prediction does the man make about the future of handwriting?

- A.Touch typing will be taught before writing by hand.
- B.Children will continue to learn to write by hand.
- C.People will dislike handwriting on digital devices.

29 The woman is concerned that relying on digital devices has made it difficult for her to

- A.take detailed notes.
- B.spell and punctuate.
- C.read old documents.

30 How do the students feel about their own handwriting?

- A.concerned they are unable to write quickly
- B.embarrassed by comments made about it
- C.regretful that they have lost the habit

Test4–listening–part4

Questions 31–40

Complete the notes below.

Write **ONE WORD ONLY** for each answer.

Research in the area around the Chembe Bird Sanctuary

The importance of birds of prey to the local communities

- They destroy and other rodents.
- They help to prevent farmers from being bitten by .
- They have been an important part of the local culture for many years.
- They now support the economy by encouraging in the area.

Falling numbers of birds of prey

- The birds may be accidentally killed
 - by when they are hunting or sleeping
 - by electrocution from contact with power lines, especially at times when there is a lot of .
- Local farmers may illegally shoot them or them.

Ways of protecting chickens from birds of prey

- clearing away vegetation from the area (unhelpful)
- providing a for chickens (expensive)
- frightening birds of prey by
 - keeping a
 - making a - e.g. with metal objects
- A of methods is usually most effective.

Test4–reading–passage1

Georgia O’Keeffe

For seven decades, Georgia O’Keeffe (1887–1986) was a major figure in American art. Remarkably, she remained independent from shifting art trends and her work stayed true to her own vision, which was based on finding the essential, abstract forms in nature. With exceptionally keen powers of observation and great finesse with a paintbrush, she recorded subtle nuances of colour, shape, and light that enlivened her paintings and attracted a wide audience.

Born in 1887 near Sun Prairie, Wisconsin to cattle breeders Francis and Ida O’Keeffe, Georgia was raised on their farm along with her six siblings. By the time she graduated from high school in 1905, she had determined to make her way as an artist. She studied the techniques of traditional painting at the Art Institute of Chicago school (1905) and the Art Students League of New York (1907–8). After attending university and then training college, she became an art teacher and taught in elementary schools, high schools, and colleges in Virginia, Texas, and South Carolina from 1911 to 1918.

During this period, O’Keeffe began to experiment with creating abstract compositions in charcoal, and produced a series of innovative drawings that led her art in a new direction. She sent some of these drawings to a friend in New York, who showed them to art collector and photographer Alfred Stieglitz in January 1916. Stieglitz was impressed, and exhibited the drawings later that year at his gallery on

Fifth Avenue, New York City, where the works of many avant-garde artists and photographers were introduced to the American public.

With Stieglitz's encouragement and promise of financial support, O'Keeffe arrived in New York in June 1918 to begin a career as an artist. For the next three decades, Stieglitz vigorously promoted her work in twenty-two solo exhibitions and numerous group installations. The two were married in 1924. The ups and downs of their personal and professional relationship were recorded in Stieglitz's celebrated black-and-white portraits of O'Keeffe, taken over the course of twenty years (1917–37).

By the mid-1920s, O'Keeffe was recognized as one of America's most important and successful artists, widely known for the architectural pictures that dramatically depict the soaring skyscrapers of New York. But most often, she painted botanical subjects, inspired by annual trips to the Stieglitz family summer home. In her magnified images depicting flowers, begun in 1924, O'Keeffe brings the viewer right into the picture.

Enlarging the tiniest details to fill an entire metre-wide canvas emphasized their shapes and lines and made them appear abstract. Such daring compositions helped establish O'Keeffe's reputation as an innovative modernist.

In 1929, O'Keeffe made her first extended trip to the state of New Mexico. It was a visit that had a lasting impact on her life, and an immediate effect on her work. Over the next two decades she made almost annual trips to New Mexico, staying up to six months there, painting in relative solitude, then returning to New York each

winter to exhibit the new work at Stieglitz's gallery. This pattern continued until she moved permanently to New Mexico in 1949.

There, O'Keeffe found new inspiration: at first, it was the numerous sun-bleached bones she came across in the state's rugged terrain that sparked her imagination. Two of her earliest and most celebrated Southwestern paintings exquisitely reproduce a cow skull's weathered surfaces, jagged edges, and irregular openings. Later, she also explored another variation on this theme in her large series of *Pelvis* pictures, which focused on the contrasts between convex and concave surfaces, and solid and open spaces.

However, it was the region's spectacular landscape, with its unusual geological formations, vivid colours, clarity of light, and exotic vegetation, that held the artist's imagination for more than four decades. Often, she painted the rocks, cliffs, and mountains in striking close-up, just as she had done with her botanical subjects.

O'Keeffe eventually owned two homes in New Mexico – the first, her summer retreat at Ghost Ranch, was nestled beneath 200-metre cliffs, while the second, used as her winter residence, was in the small town of Abiquiú. While both locales provided a wealth of imagery for her paintings, one feature of the Abiquiú house – the large walled patio with its black door – was particularly inspirational. In more than thirty pictures between 1946 and 1960, she reinvented the patio into an abstract arrangement of geometric shapes.

From the 1950s into the 1970s, O'Keeffe travelled widely, making trips to Asia, the Middle East, and Europe. Flying in planes inspired her last two major series – aerial

views of rivers and expansive paintings of the sky viewed from just above clouds. In both series, O’Keeffe increased the size of her canvases, sometimes to mural proportions, reflecting perhaps her newly expanded view of the world. When in 1965 she successfully translated one of her cloud motifs to a monumental canvas measuring 6 metres in length (with the help of assistants), it was an enormous challenge and a special feat for an artist nearing eighty years of age.

The last two decades of the artist’s life were relatively unproductive as ill health and blindness hindered her ability to work. O’Keeffe died in 1986 at the age of ninety-eight, but her rich legacy of some 900 paintings has continued to attract subsequent generations of artists and art lovers who derive inspiration from these very American images.

Questions 1–7

Complete the notes below.

Choose **ONE WORD ONLY** from the passage for each answer.

The life and work of Georgia O'Keeffe

- studied art, then worked as a in various places in the USA
- created drawings using which were exhibited in New York City
- moved to New York and became famous for her paintings of the city's
- produced a series of innovative close-up paintings of
- went to New Mexico and was initially inspired to paint the many that could be found there
- continued to paint various features that together formed the dramatic of New Mexico for over forty years
- travelled widely by plane in later years, and painted pictures of clouds and seen from above

Questions 8–13

Do the following statements agree with the information given in Reading Passage 1?

TRUE if the statement agrees with the information

FALSE if the statement contradicts the information

NOT GIVEN if there is no information on this

8 Georgia O'Keeffe's style was greatly influenced by the changing fashions in art over the seven decades of her career.

9 When O'Keeffe finished high school, she had already made her mind up about the career that she wanted.

10 Alfred Stieglitz first discovered O'Keeffe's work when she sent some abstract drawings to his gallery in New

York City.

11 O'Keeffe was the subject of Stieglitz's photographic work for many years.

12 O'Keeffe's paintings of the patio of her house in Abiquiú were among the artist's favourite works.

13 O'Keeffe produced a greater quantity of work during the 1950s to 1970s than at any other time in her life.

Test4–reading–passage2

Adapting to the effects of climate change

A All around the world, nations are already preparing for, and adapting to, climate change and its impacts. Even if we stopped all CO₂ emissions tomorrow, we would continue to see the impact of the CO₂ already released since industrial times, with scientists forecasting that global warming would continue for around 40 years. In the meantime, ice caps would continue to melt and sea levels rise. Some countries and regions will suffer more extreme impacts from these changes than others. It's in these places that innovation is thriving.

B In Miami Beach, Florida, USA, seawater isn't just breaching the island city's walls, it's seeping up through the ground, so the only way to save the city is to lift it up above sea level. Starting in the lowest and most vulnerable neighbourhoods, roads have been raised by as much as 61 centimetres. The elevation work was carried out as part of Miami Beach's ambitious but much-needed stormwater-management programme. In addition to the road adaptations, the city has set up new pumps that can remove up to 75,000 litres of water per minute. In the face of floods, climate-mitigation strategies have often been overlooked, says Yanira Pineda, a senior sustainability coordinator. She knows that they're essential

and that the job is far from over. 'We know that in 20, 30, 40 years, we'll need to go back in there and adjust to the changing environment,' she says.

C Seawalls are a staple strategy for many coastal communities, but on the soft, muddy northern shores of Java, Indonesia, they frequently collapse, further exacerbating coastal erosion. There have been many attempts to restore the island's coastal mangroves: ecosystems of trees and shrubs that help defend coastal areas by trapping sediment in their net-like root systems, elevating the sea bed and dampening the energy of waves and tidal currents. But Susanna Tol of the not-for-profit organisation Wetlands International says that, while hugely popular, the majority of mangrove-planting projects fail. So, Wetlands International started out with a different approach, building semi-permeable dams, made from bamboo poles and brushwood, to mimic the role of mangrove roots and create favourable conditions for mangroves to grow back naturally. The programme has seen moderate success, mainly in areas with less subsidence. 'Unfortunately, traditional infrastructure is often single-solution focused,' says Tol. 'For long-term success, it's critical that we transition towards multifunctional approaches that embed natural processes and that engage and benefit communities and local decision-makers.'

D As the floodwaters rose in the rice fields of the Mekong Delta in September 2018, four small houses rose with them. Homes in this part of Vietnam are traditionally built on stilts but these ones had been built to float. The modifications were made by the Buoyant Foundation Project, a not-for-profit organisation that has been researching and retrofitting amphibious houses since 2006. 'When I started this,' explains founder Elizabeth English, 'climate change was not on the tip of

everybody's tongue, but this technology is becoming necessary in places that didn't previously need it.' It's much cheaper than permanently elevating houses, English explains – about a third of what it would cost to completely replace a building's foundations. It also avoids the problem of taller houses being at greater risk from wind damage. Another plus comes from the fact that amphibious structures can be sensitively adapted to meet cultural needs and match the kind of houses that are already common in a community.

E Bangladesh is especially vulnerable to climate change. Most of the country is less than a metre above sea level and 80 per cent of its land lies on floodplains. 'Almost 35 million people living on the coastal belt of Bangladesh are currently affected by soil and water salinity,' says Raisa Chowdhury of the international development organisation ICCO Cooperation. Rather than fighting against it, one project is helping communities adapt to salt-affected soils. ICCO Cooperation has been working with 10,000 farmers in Bangladesh to start cultivating naturally salt-tolerant crops in the region. Certain varieties of carrot, potato, kohlrabi, cabbage and beetroot have been found to be better suited to salty soil than the rice and wheat that is typically grown there. Chowdhury says that the results are very visible, comparing a barren plot of land to the 'beautiful, lush green vegetable garden' sitting beside it, in which he and his team have been working with the farmers. Since the project began, farmers trained in saline agriculture have reported increases of two to three more harvests per year.

F Greg Spotts from Los Angeles (LA) in the USA is chief sustainability officer of the city's street services department. He leads the Cool Streets LA programme, a

series of pilot projects, which include the planting of trees and the installation of a ‘cool pavement’ system, designed to help reach the city’s goal of bringing down its average temperature by 1.5°C. ‘Urban cooling is literally a matter of life and death for our future in LA,’ says Spotts. Using a Geographic Information System data mapping tool, the programme identified streets with low tree canopy cover in three of the city’s neighbourhoods and covered them with a light-grey, light-reflecting coating, which had already been shown to lower road surface temperature in Los Angeles by 6°C. Spotts says one of these streets, in the Winnetka neighbourhood of San Fernando Valley, can now be seen as a pale crescent, the only cool spot on an otherwise red thermal image, from the International Space Station.

Questions 14–17

Reading Passage 2 has six paragraphs, **A–F**.

Which paragraph contains the following information?

Column 1	A	B	C	D	E	F
14. how a type of plant functions as a natural protection for coastlines						
15. a prediction about how long it could take to stop noticing the effects of climate change						
16. a reference to the fact that a solution is particularly cost-effective						
17. a mention of a technology used to locate areas most in need of intervention						

Questions 18–22

Complete the sentences below.

Choose **ONE WORD ONLY** from the passage for each answer.

18 The stormwater-management programme in Miami Beach has involved the installation of efficient 18 .

19 The construction of 19 was the first stage of a project to ensure the success of mangroves in Indonesia.

20 As a response to rising floodwaters in the Mekong Delta, a not-for-profit organisation has been building houses that can 20 .

21 Rising sea levels in Bangladesh have made it necessary to introduce various 21 that are suitable for areas of high salt content.

22 A project in LA has increased the number of 22 on the city's streets.

Questions 23–26

Look at the following statements (Questions 23–26) and the list of people below.

Match each statement with the correct person, **A–E**.

- 23. It is essential to adopt strategies which involve and help residents of the region.
- 24. Interventions which reduce heat are absolutely vital for our survival in this location.
- 25. More work will need to be done in future decades to deal with the impact of rising water levels.
- 26. The number of locations requiring action to adapt to flooding has grown in recent years.

- List of People
A. Yanira Pineda
B. Susanna Tol
C. Elizabeth English
D. Raisa Chowdhury
E. Greg Spotts

Test4–reading–passage3

A new role for livestock guard dogs

Livestock guard dogs, traditionally used to protect farm animals from predators, are now being used to protect the predators themselves

A For thousands of years, livestock guard dogs worked alongside shepherds to protect their sheep, goats and cattle from predators such as wolves and bears. But in the 19th and 20th centuries, when such predators were largely exterminated, most guard dogs lost their jobs. In recent years, however, as increased efforts have been made to protect wild animals, predators have become more widespread again. As a result, farmers once more need to protect their livestock, and guard dogs are enjoying an unexpected revival.

B Today there are around 50 breeds of guard dogs on duty in various parts of the world. These dogs are raised from an early age with the animals they will be watching and eventually these animals become the dog's family. The dogs will place themselves between the livestock and any threat, barking loudly. If necessary, they will chase away predators, but often their mere presence is sufficient. 'Their initial training is to make them understand that livestock is going to be their life,' says Dan

Macon, a shepherd with three guard dogs. 'A fluffy white puppy is fun to be around, but too much human affection makes it a great dog for guarding the front porch, rather than a great livestock guard dog.'

C The evidence indicates that guard dogs are highly effective. For example, in Portugal, biologist Silvia Ribeiro has found that more than 90 per cent of the farmers participating in a programme to train and use guard dogs to protect their herds against attack from wolves rate the performance of the dogs as very good or excellent. In a study carried out in Australia by Linda van Bommel and Chris Johnson at the University of Tasmania, more than 65 per cent of herders reported that predation stopped completely after they got the dogs, and almost all the rest saw a decrease in attacks. 'If they are managed and used properly, livestock guard dogs are the most efficient control method that we have in terms of the amount of livestock that they save from predation,' says van Bommel.

D But today's guard dogs also have a new role – to help preserve the predators. It is hoped that reductions in livestock losses can make farmers more tolerant of predators and less likely to kill them. In Namibia, more than 90 per cent of cheetahs live outside protected areas, close to humans raising livestock. As a result, the cheetahs are often held responsible for animal losses, and large numbers have been killed by farmers. When guard dogs were introduced, more than 90 per cent of farmers reported a dramatic reduction in livestock losses, and said that as a result they were less likely to kill predators. Julie Young, at Utah State University in the US, believes this result applies widely. 'There is common ground from the livestock

perspective and from the conservation perspective,’ she says. ‘If ranchers don’t have a dead cow, they will not make a call to apply for a permit to kill a wolf.’

E Looking at all the published evidence, Bethany Smith at Nottingham Trent University in the UK found that up to 88 per cent of farmers said they no longer killed predators after using dogs – but warned that such self-reported results must be taken with a pinch of salt. What’s more, it is possible that livestock guard dogs merely displace predators to unprotected neighbouring properties, where their fate isn’t recorded. ‘In some regions, we work with almost every farmer, but in others only one or two have dogs,’ says Ribeiro. ‘If we are not working with everybody, we are transferring the wolf pressure to the neighbour’s herd and he can use poison and kill an entire pack of wolves.’

F Another concern is whether there may be unintended ecological effects of using guard dogs. Studies suggest that reducing deaths of one type of predator may have a negative impact on other species. The extent of this problem isn’t known, but the consequences are clear in Namibia. Cheetahs aren’t the only species that cause sheep and goat losses there: other predators also attack livestock. In 2015, researchers reported that in spite of the impact farmers obtaining guard dogs had on cheetahs, the number of jackals killed by dogs and people actually increased. Guard dogs have other ecological impacts too. They have been found to spread diseases to wild animals, including endangered Ethiopian wolves. They may also compete with other carnivores for food. And by creating a ‘landscape of fear’, their mere presence can influence the behaviour of prey animals.

G The evidence so far, however, indicates that these consequences aren't always negative. Guard dogs can deliver unexpected benefits by protecting vulnerable wildlife from predators. For example, their presence has been found to protect birds which build their nests on the ground in fields, where foxes would normally raid them. Indeed, Australian researchers are now using dogs to enhance biodiversity and create refuges for species threatened by predation. So if we can get this right, there may be a bright future for guard dogs in promoting harmonious coexistence between humans and wildlife.

Questions 27–31

Reading Passage 3 has seven paragraphs, **A–G**.

Which paragraph contains the following information?

NB You may use any letter more than once.

Column 1	A	B	C	D	E	F	G
27. an example of how one predator has been protected by the introduction of livestock guard dogs							
28. an optimistic suggestion about the possible positive developments in the use of livestock guard dogs							
29. a description of how the methods used by livestock guard dogs help to keep predators away							
30. claims by different academics that the use of livestock guard dogs is a successful way of protecting farmers' herds							
31. a reference to how livestock guard dogs gain their skills							

Look at the following statements (Questions 32 – 36) and the list of people below.

Match each statement with the correct person, A – E.

- 32. The use of guard dogs may save the lives of both livestock and wild animals.
- 33. Claims of a change in behaviour from those using livestock guard dogs may not be totally accurate.
- 34. There may be negative results if the use of livestock guard dogs is not sufficiently widespread.
- 35. Livestock guard dogs are the best way of protecting farm animals, as long as the dogs are appropriately handled.
- 36. Teaching a livestock guard dog how to do its work needs a different focus from teaching a house guard dog.

List of people

- A. Dan Macon
- B. Silvia Ribeiro
- C. Linda van Bommel
- D. Julie Young
- E. Bethany Smith

Questions 37–40

Complete the summary below.

Choose **ONE WORD ONLY** from the passage for each answer.

Unintended ecological effects of using guard dogs

In Namibia, livestock guard dogs have been used to protect domestic animals from attacks by cheetahs.

This has led to a rise in the deaths of other predators, particularly 37. In addition, it

has been suggested that the dogs could have 38 which may affect other species,

and that they may reduce the amount of 39 available to certain wild animals.

On the other hand, these dogs may help birds by protecting their nests. These might otherwise be

threatened by predators such as 40.

Test4–writing–task1

You should spend about 20 minutes on this task. Write at least 150 words.

You should spend about 20 minutes on this task.

The diagram below shows how fabric is manufactured from bamboo.

Summarise the information by selecting and reporting the main features, and make comparisons where relevant.

Write at least 150 words.

How bamboo fabric is made

You should spend about 40 minutes on this task. Write at least 250 words.

You should spend about 40 minutes on this task. Write about the following topic:

Many aspects of the way people dress today are influenced by global fashion trends.

How has global fashion become such a strong influence on people's lives? Do you think this is a positive or negative development?

Give reasons for your answer and include any relevant examples from your own knowledge or experience.

Write at least 250 words.

小作文【考生范文】

This is an answer written by a candidate who achieved a **Band 6.0** score.

The given diagram describes the process of manufacturing bamboo fabrics.

Overall, the process includes a few main stages, which are shown on the diagram and are numbered from 1 to 8.

The first stage, obviously, consists of planting and growing bamboo plants, usually happening in spring.

The second phase, We could say harvesting one, is happening in the middle part of the year in autumn. Bamboo stems are cutting off by the season workers, collecting and sendening to the special plants during this period.

In the plants, what are showed a the third and the forth stages. on the diagram, the bamboo stems are cutting into long strips, then produced strips are crushing to make liquid pulp.

During the next phase these pulp is filtering through the special types of sieves to separate long fibres from liquid.

Then the fibres, filtered by previous step, are being undergone through the softenning procedure. This procedure includes adding water and amine oxide.

The seventh stage is the sppinning the soften fibres to make a strong bamboo thread.

Produced yarns might be used to make fabric, which is the last — eighth phase, by weaving them using special equipment.

【考官评语】

Here is the examiner's comment:

This is generally a good response, and it presents the key stages shown in the process. There is an overview, but it is rather generic and only tells us how many main stages there are [main stages...are numbered from 1 to 8]. To improve the overview, instead of reporting the number of stages, there should be a summary of the main stages.

Ideas are arranged logically. There are some nice linking expressions, appropriate for a 'process' [The first stage | then | During the next phase | which is] but there is some repetition [The first stage | The second phase | third and the forth stages | next phase | seventh stage | eighth phase]. Most of the sentences start on a new line — this means paragraphing is not present.

Vocabulary is appropriate and spelling is generally well managed but there are errors. Grammatical structures are mixed but errors in verb forms are noticeable, particularly in passive structures [are cutting / are cut | are being undergone / undergo].

To achieve a higher score, the candidate should present an overview which summarises the main stages and paragraphing should be used to better organise the stages.

Example overview

The main stages of bamboo fabric production include harvesting bamboo plants, putting them through processes to extract the fibres, then spinning and weaving those fibres to create fabric.

【参考翻译】

这是一篇内容充实、细节丰富且发展充分的回答。文中提出了多个恰当的观点，立场在第一段就明确给出，并在全文中得到了一致的支持和论证。若想进一步提升，可以在“对个人的影响”方面提供更多细节，因为目前大多数例子集中在“企业”方面。

文章思路组织清晰，段落安排合理，整体连贯性强。全文衔接自然流畅，连接手段使用得当，读者可以轻松跟随作者的思路。

词汇运用熟练、灵活，表现出较强的语言能力，例如 [translate to higher expenses | devastating effects | potential implications]，拼写基本准确，仅有个别词语选择上的小错误 [commence them / start them | eventuate in / result in]。语法结构的使用范围也很广，频繁出现多从句复合句，整体语言错误很少。

若想获得更高的分数，考生应在文章开头或结尾添加一个总结性的概述，并通过更合理的段落划分来更好地组织内容。

参考概述示例：

竹纤维布料的生产主要包括几个主要阶段：收割竹子、对其进行处理以提取纤维，然后将这些纤维纺纱并织造成布料。

大作文【考生作文】

This is an answer written by a candidate who achieved a **Band 7.0** score.

The way many of us are dressed today is believed to be affected by the fashion industry. The reason why it is so important for some people to choose their clothes according to the trends may be in our dependence on what is popular at

the moment which is a double-edged sword. Of course, trying to keep up with modern fads consumes pretty much time and energy, but is it really that negative in terms of maintaining individuality? To my mind, it is not.

Not surprisingly, global fashion has influenced people's tastes in clothing a great deal. We all see those celebrities on TV and on the Internet boasting their brand new outfit making many men and women jealous. Would blond hair in concert with a white dress have been so popular back in the day if it had not been for the voluptuous Marilyn Monroe? world-wide famous fashion designers keep surprising consumers with their wild imagination producing more and more types of style. For instance over-sized winter coats have drawn attention not only from the youth but from the middle-aged as well.

Fashions by many are believed to dictate people how to look. They impose new styles, and some people wear certain clothes just because another designer told them to do so.

Looking on the bright side, there's absolutely no harm in getting advice from the fashion industry on what to wear this season. Moderation is the key. Do not overdo it. If you put on a garment that is really comfortable and suitable for you, it does not really matter whether it is fashionable or not. Your individuality won't be hurt if you simply like something that is in trend.

【考官评语】

Here is the examiner's comment:

This is a strong response overall. The first part, on the influence of global fashion trends is clear and detailed: people are influenced because they see celebrities on

TV and the internet, want to copy famous icons like Marilyn Monroe, continue to be surprised by designers, wild imagination and experience more and more styles. The response to the second part is less well covered. The 'negative' side of this question is not addressed very thoroughly, apart from saying it takes [time and energy] to keep up with modern fads. The 'positives' include that there is [no harm in getting advice] on what to wear. More focus on the second part would improve the response.

Progression is logical. Linking expressions are appropriate [Of course | For instance | Looking on the bright side] with some good examples of reference [their | those | another] and paragraphing is helpful (although paragraphs 3 and 4 could be combined as they cover the same idea).

Vocabulary use is strong with some precise meanings and effective collocation [keep up | modern fads | influenced people's tastes | impose new styles] there are some small slips in spelling [important | maintainig | voloptious] although the meaning is clear. Sentences are varied and contain complex structures. There are multi-clause sentences with a range of structures, including conditionals [if], but a few errors remain.

Overall, this is a good response. To achieve a higher score, the candidate should include a few more ideas around the 'positive or negative' influence of global fashion trends.

【参考翻译】

总体来看，这是一篇表现较强的回答。第一部分关于全球时尚趋势的影响写得清晰且详细：人们受到电视和网络上名人的影响，想要模仿玛丽莲·梦露等偶像，也持续被设计师充满想象力的新风格所吸引，并能体验到越来越多样的时尚风格。

但第二部分的展开则相对较弱。“负面”影响方面没有充分讨论，仅提到要花[时间和精力]去追赶潮流。而“正面”影响部分也只是简单提到在穿衣打扮上[接受建议并无害处]。如果能在第二部分多着墨一些，整篇文章会更加平衡、更具深度。

文章思路推进逻辑清晰，连接词使用恰当，如 [Of course | For instance | Looking on the bright side]，并有较好的指代表达 [their | those | another]。段落安排也有助于理解（尽管第 3 和第 4 段可以合并，因为它们表达的是同一个观点）。

词汇运用较强，有不少表达准确、搭配得当的例子，如 [keep up | modern fads | influenced people's tastes | impose new styles]。虽然存在一些拼写小错误 [important | maintainig | voloptious]，但并不影响整体意思的理解。句子结构多样，包含复杂的语法形式，例如多从句句子以及条件状语从句 [if]，但仍有少量语言错误。总的来说，这是一篇不错的回答。若想获得更高分，考生应在“全球时尚趋势是积极还是消极影响”这一问题上提出更多观点，以增强论证的广度与深度。

Test1-speaking

Test 1-Part 1

Please answer the questions 1-4

1. What do you think your best personal qualities are? [Why?]
2. Do you have the same personal qualities as your parents? [Why/Why not?]
3. What personal qualities are important to you in a friend? [Why?]
4. Do you think you have the personal qualities to be a good/successful leader? [Why/Why not?]

Test 4-Part 2

Please answer the question

Describe a time when you had a long discussion about a news story.

You should say:

- what the news story was about
- who you discussed this news story with
- what people's opinions were

and explain why you had such a long discussion about this news story.

Test 4-Part 3

Please answer the questions 1-6

1. How do most people find out about the news in your country?
2. Are people more interested in local news than national news?
3. How important is it to know about international news?
 1. Why are discussion programmes involving members of the public popular on [TV and radio]?
 2. What kinds of people want to take part in discussion programmes?
 3. Do discussion programmes influence people in a good or bad way?

答案

p1

1. Well, I guess one of my best personal traits is that I'm pretty easy-going. I mean, I don't get upset easily and I'm usually able to stay calm even under pressure. Also, people say I'm a good listener, which I think is kind of important, especially when someone just wants to vent or share stuff.

2. Yeah, I'd say so. My dad is really patient and rarely loses his temper, and I think I've inherited that from him. As for my mum, I definitely take after her in terms of personality. She's super outgoing, maybe even more than I am. So yeah, I guess I've got a bit of both!

3. Well, for me, honesty is definitely essential. I really value friends who are genuine and speak their mind, even if it's not always what I want to hear. I just can't stand being lied to. I also think being supportive is a key quality. You know, someone I can truly count on when things get tough, not just a fair-weather friend who only shows up when life is good.

4. Well, I think I do have some of the qualities that make a good leader. For one, I'm quite good at listening and taking other people's opinions into account before making decisions, which I think is really essential in leadership. I'm also pretty organized and goal-oriented. Having said that, I still have a lot to learn, like how to handle conflicts better or motivate people in tough situations.

p2

OK, I'm going to talk about a time when I had a really long but interesting discussion with my friends about a news story about artificial intelligence. It was about how AI was being used to replace some human jobs, especially in areas like teaching.

Anyway, I remember it was about maybe 2 months ago, we were hanging out at a café on a weekend, and one of my friends brought it up because he had read an article online saying that some companies in China had already started using AI teachers in classrooms, which he thought was amazing. We took a lot of interest in the topic, because a few of us are working in education or tech.

So, that was how the discussion began. Some of us thought it was a great idea. You know, more efficient, cost-effective, and AI never gets tired. But others were a bit worried, saying that it could take away the human touch in teaching, and might lead to job losses. I was personally kind of in the middle. I mean, for me, AI can be helpful, but it shouldn't fully replace real people, especially in jobs that need empathy and communication.

Anyway, that day we ended up talking for almost two hours because everyone was so engaged and had a lot to

say. Since it's a topic that could affect all of us in the near future, it naturally led to such a long and meaningful discussion. Although we didn't exactly agree on everything, it was a really intriguing conversation that gave us plenty of food for thought.

p3

1. Well, I think these days most people in China find out about news mainly through digital platforms, like smartphones. I mean, if you open an app like WeChat or Weibo, you can immediately see what's happening, because these apps constantly update you with breaking news and trending topics. Short-video platforms like Douyin, which you might know as TikTok, are also very popular for catching up on news, especially among younger people. But of course, if you're older, you might still prefer traditional ways, like watching TV. You know, channels like CCTV news are still really common in homes, and a lot of older folks rely on these for daily news updates.

2. Well, it's kind of hard to say. I mean, if you're thinking about your day-to-day life, you might find local news more appealing, because it directly affects things like the weather forecast, traffic conditions, or even what's happening in your neighborhood. I mean, local news is just more relatable, and you usually feel it immediately. But, on the other hand, national news is also important to a lot of people because it covers bigger issues, like new policies or economic developments that can influence their job prospects, education, or housing. So yeah, I guess most people would follow both types, but it kind of depends on what's more relevant to their lives at that moment.

3. Well, I think it's quite necessary. If you pay attention to what's happening globally, it can really help you expand your perspective. I mean, you get to understand how people in different parts of the world live, what challenges they're facing, and how different countries interact with each other. Also, staying informed about international news can help you make better decisions in your own life. For example, if you're planning to travel abroad, invest your money, or even choose your career path, knowing what's going on internationally could definitely help you avoid potential risks and take advantage of new opportunities.

1. Well, I'd say it's mainly because they're really interactive and engaging. You know, when ordinary people participate and express their opinions, it makes you feel more connected and engaged. I mean, it's like you're part of the conversation yourself. Another reason would be that these programmes tend to reflect real-world perspectives. I mean, instead of just hearing experts or celebrities talking, you're listening to everyday people who might share your own experiences or concerns, so the discussions feel more relevant and genuine.

2. Well, I think if you're someone who really enjoys expressing your own views, you'll probably want to get on a discussion programme. I mean, when you've got strong feelings about an issue, like something related to politics, education, or social trends, you might want to jump at the chance to explain your side and debate with others. Also, I'd say if you're the type of person who wants your voice to be heard by a wider audience or even influence public opinion, it's also a great idea to take part in a discussion show, where, you know, you can get a mic, a platform to voice your opinion publicly.

3. Well, I'd say people can be influenced in both ways. On the positive side, these programmes often expose you to different viewpoints, helping you understand complex issues better. I mean, when you hear people with various backgrounds share their opinions, it can really broaden your mind and help you become more open-minded. But on the other hand, if the discussions become too heated or biased, they might negatively influence you by spreading misunderstandings or even encouraging conflicts. You know, sometimes people get emotional and say things that aren't exactly balanced, which might lead you to form incorrect or incomplete views about certain topics.
