

How would you describe a healthy lifestyle?

Well, **I think first of all**, it's crucial that we don't eat too much junk food. We all know that junk food is a cause of obesity and obesity is linked to diseases like liver cancer, pancreatic cancer and so on. **Plus**, we should stay active. **By that I mean**, it's of great importance to do some physical activities. Actually, it doesn't matter what you do, be it running, swimming or playing soccer. As long as you're out there being active, it'll do you a lot of good.

Nowadays, many people don't live healthily, why?

Well, **the first reason that comes to mind is that** many people are just too lazy. You know, they just like to stay home and never work out. **I suppose another reason is that** the competition on the job market today is extremely fierce and in order to keep their job or get a better job, many people are juggling many things at a time. **In this case**, they just don't have enough time to go and have a decent meal or go to the gym. I believe most people would like a healthy lifestyle if they weren't so busy.
