Questions 33-37

Choose the correct letter, A, B, C or D.

Write your answers in boxes 33-37. On your answer sheet.

- 33 What aspect of scientific research does the writer express concern about in paragraph 4?
- A the need to produce results
 - B the lack of financial support
 - C the selection of areas to research
 - D the desire to solve every research problem
- 34 The writer quotes from the Worldwide Fund for Nature to illustrate how
- A influential the mass media can be.
 - B effective environmental groups can be.
 - C the mass media can help groups raise funds.
 - D environmental groups can exaggerate their claims.
- 35 What is the writer's main point about
- A Some are more active.
 - B Some are more effective.
 - C Some are more influential.
 - D Some are more successful.
- 36 The writer argues that newspapers print items that are intended to
- A educate readers.
 - B meet their readers' expectations.
 - C encourage feedback from readers.
 - D mislead readers.
- 37 What does the writer say about America's waste problem?
- A It will increase in line with population growth.
 - B It is not as important as we have been led to believe.
 - C It has been reduced through public awareness of the issues.
 - D It is only significant in certain areas of the country.

IELTS CINEMA

有的片子里，如果男女主角非常突出，所有人都是陪衬。那么不管是选择还是判断，都围绕着核心进行，基本上没有争议。有的影片，塑造的是一个团队，同时打造多位主角，邀请数名同量级的当红演员出演，一时间星光灿烂，交相辉映。这时就是多选题了。

电影交织着戏剧冲突，越复杂越能调动情绪。尽管如此，再复杂前卫的影片还是有主线中心的。作为观众，不能只感叹于视觉冲击和享受，要看到一部影片的灵魂。

学习本回，有三大要点

第一，充分理解选择题的命题规律：中国学生比较熟悉的选择题的形式是单选题。

第二，分题型训练：对于不熟悉的题型或者没有把握的题型必须多训练。

第三，积累考点词：做过的阅读真题已经不具有测试意义了，但是可以帮你印证和理解考点词的奥秘。大家可以对照《剑桥雅思阅读考点词真经》体验“无招胜有招”的绝佳境界。

选择，凭的是理解。

选择题命题规律与解题诀窍

雅思的选择题可以细分为：

- ① 单选题（ABCD单选）；
- ② 多选题（五选二、七选三等）；
- ③ 选标题（全文中心思想）

概率：不是每次考试都出现

难度：★★★★☆☆

ABCD的单选题型是中国考生最熟悉的，这些题**难度不高，不是每次考试都会出现**。

大家要背背口诀，重点了解这种选择题型正确选项的命题思路。

单选题

单选题其实是选TRUE的表达，即正确选项和题干组合在一起，成为一个TRUE的表达句子。

其他干扰选项则构成NOT GIVEN或FALSE的表达句子。因此，单选题的难度低于TRUE/FALSE/

NOT GIVEN题型。 **单选是TRUE题**

解题思路是：用题干中Keywords回原文定位（尽量不要用选项中Keywords定位，那是排除法）。

注意正确选项的两种命题规则：

① 对原文中的一句话同义改写；

② 对原文上下文归纳。

真题示例 A

《剑桥雅思8》第50页 Test 2 Reading Passage 3 A~E段

The begin

The meaning and power of smell

The sense of smell, or olfaction, is powerful. Odours affect us on a physical, psychological and social level. For the most part, however, we breathe in the aromas which surround us without being consciously aware of their importance to us. It is only when the faculty of smell is impaired for some reason that we begin to realise the essential role the sense of smell plays in our sense of well-being.

- A A survey conducted by Anthony Synott at Montreal's Concordia University asked participants to comment on how important smell was to them in their lives. It became apparent that smell can evoke strong emotional responses. A scent associated with a good experience can bring a rush of joy, while a foul odour or one associated with a bad memory may make us grimace with disgust. Respondents to the survey noted that many of their olfactory likes and dislikes were based on emotional associations. Such associations can be powerful enough so that odours that we would generally label unpleasant become agreeable, and those that we would generally consider fragrant become disagreeable for particular individuals. The perception of smell, therefore, consists not only of the sensation of the odours themselves, but of the experiences and emotions associated with them.
- B Odours are also essential cues in social bonding. One respondent to the survey believed that there is no true emotional bonding without touching and smelling a loved one. In fact, infants recognise the odours of their mothers soon after birth and adults can often identify their children or spouses by scent. In one well-known test, women and men were able to distinguish by smell alone clothing worn by their marriage partners from similar clothing worn by other people. Most of the subjects would probably never have given much thought to odour as a cue for identifying family members before being involved in the test, but as the experiment revealed, even when not consciously considered, smells register.
- C In spite of its importance to our emotional and sensory lives, smell is probably the most undervalued sense in many cultures. The reason often given for the low regard in which smell is

held is that, in comparison with its importance among animals, the human sense of smell is feeble and undeveloped. While it is true that the olfactory powers of humans are nothing like as fine as those possessed by certain animals, they are still remarkably acute. Our noses are able to recognise thousands of smells, and to perceive odours which are present only in extremely small quantities.

- D** Smell, however, is a highly elusive phenomenon. Odours, unlike colours, for instance, cannot be named in many languages because the specific vocabulary simply doesn't exist. "It smells like..." we have to say when describing an odour, struggling to express our olfactory experience. Nor can odours be recorded: there is no effective way to either capture or store them over time. In the realm of olfaction, we must make do with descriptions and recollections. This has implications for olfactory research.
- E** Most of the research on smell undertaken to date has been of a physical scientific nature. Significant advances have been made in the understanding of the biological and chemical nature of olfaction, but many fundamental questions have yet to be answered. Researchers have still to decide whether smell is one sense or two—one responding to odours proper and the other registering odourless chemicals in the air. Other unanswered questions are whether the nose is the only part of the body affected by odours, and how smells can be measured objectively given the nonphysical components. Questions like these mean that interest in the psychology of smell is inevitably set to play an increasingly important role for researchers.
- ...

Questions 33–36

Choose the correct letter, **A**, **B**, **C** or **D**.

Write the correct letter in boxes 33–36 on your answer sheet.

- 33** According to the introduction, we become aware of the importance of smell when
- A** we discover a new smell.
 - B** we experience a powerful smell.
 - C** our ability to smell is damaged.
 - D** we are surrounded by odours.
- 34** The experiment described in paragraph B
- A** shows how we make use of smell without realising it.
 - B** demonstrates that family members have a similar smell.

- C proves that a sense of smell is learnt.
D compares the sense of smell in males and females.
- 35 What is the writer doing in paragraph C?
A supporting other research
B making a proposal
C rejecting a common belief
D describing limitations
- 36 What does the writer suggest about the study of smell in the atmosphere in paragraph E?
A The measurement of smell is becoming more accurate.
B Researchers believe smell is a purely physical reaction.
C Most smells are inoffensive.
D Smell is yet to be defined.

题目	解题思路与答案
33	答案：C 正确选项是对原文中的一句话的同义改写。(T1) 引言最后一句：It is only when the faculty of smell is impaired for some reason that we begin to realise the essential role the sense of smell plays in our sense of well-being. 下划线部分=题目中we become aware of the importance. impaired (受损伤) 一词=C选项中damaged。
34	答案：A 正确选项是对原文中的一句话的同义改写。(T1) A选项中make use of smell对应B段最后一句话中odour as a cue for identifying family members, 而without realising it对应never have given much thought, 和最后一行not consciously (有意识的) considered。
35	答案：C 正确选项是对原文上下文的归纳。(T2) C选项中的rejecting (反驳) a common belief指C段中作者认为：嗅觉是被人们undervalued sense in many cultures(=common). 虽然和某些动物相比，人类的嗅觉没有那么fine (敏锐)，但是，they are still remarkable acute。

答案：D

36

正确选项是对原文上下文的归纳。(T2)

D选项Smell 仍需被定义解释。对应E段中作者抛出的许多关于嗅觉悬而未决的问题。

The Nature of Genius

...

The concept of genius and of gifts has become part of our folk culture, and attitudes are ambivalent towards them. We envy the gifted and mistrust them. In the mythology of giftedness, it is popularly believed (1)that if people are talented in one area, they must be defective in another, (2)that intellectuals are impractical, (3)that prodigies burn too brightly too soon and burn out, (4)that gifted people are eccentric, (5)that they are physical weaklings, (6)that there's a thin line between genius and madness, (7)that genius runs in families, (8)that the gifted are so clever they don't need special help, (9)that giftedness is the same as having a high IQ, (10)that some races are more intelligent or musical or mathematical than others, (11)that genius goes unrecognised and unrewarded, (12)that adversity makes men wise or (13)that people with gifts have a responsibility to use them. Language has been enriched with such terms as "highbrow", "egghead", "blue-stocking", "wiseacre", "know-all", "boffin" and, for many, "intellectual" is a term of denigration.

Write the correct letters in boxes 14–18 on your answer sheet.

NB Your answers may be given in any order.

Below are listed some popular beliefs about genius and giftedness.

Which **FIVE** of these beliefs are reported by the writer of the text?

- A Truly gifted people are talented in all areas.
- B The talents of geniuses are soon exhausted.
- C Gifted people should use their gifts.
- D A genius appears once in every generation.
- E Genius can be easily destroyed by discouragement.
- F Genius is inherited.
- G Gifted people are very hard to live with.
- H People never appreciate true genius.
- I Geniuses are natural leaders.
- J Gifted people develop their greatness through difficulties.

图表，其实是一种形式，视觉冲击力强，为的是把语言的逻辑进一步形象化。图表题，更强调信息和考点词。

记得电影中，当福尔摩斯完成一连串推理要得出结论的时候，通常会把结论放大。如果是信息，就会给单词字迹特写，这就是表格题；如果是地点，就会有一个轮廓或者将地图放大，这就是示意图；如果是要强调推理过程，就会有一系列因果箭头推导，为的是理清思路逻辑，这就是流程图。

雅思阅读中的图表题，都是有据可循的。一起看吧。

学习本回，有三大要点

第一，熟悉图表题的四种形式：不同的图表题规律性有差异。

第二，深入理解例题：此类习题的例题不多，所以更要珍惜示例。

第三，积累考点词：图表题以信息和理解为主，更能发挥考点词的作用。

图表，逐个击破。

图表题命题规律与解题诀窍

雅思阅读的图表题可细分为：

- ① 填表题
- ② 填图题
- ③ 选图题

概率：不是每次考试都出现

难度：★☆☆☆☆

我们把带图的题归类在一起。图表题不是每次考试都出现，出题概率很低。因为题目设计要么局限于表格逻辑结构，要么围绕事物的流程原理，所以该题型难度也很低，是雅思阅读中的送分题。真实考试中应花时间争取全对。

《剑桥雅思4》第23页 Test 1 Reading Passage 2

..... The begin

You should spend about 20 minutes on **Questions 15–26** which are based on Reading Passage 2 below.

What Do Whales Feel?

An examination of the functioning of the senses in cetaceans, the group of mammals comprising whales, dolphins and porpoises

Some of the senses that we and other terrestrial mammals take for granted are either reduced or absent in cetaceans or fail to function well in water. For example, it appears from their brain structure that toothed species are unable to smell. Baleen species, on the other hand, appear to have some related brain structures but it is not known whether these are functional. It has been speculated that, as the blowholes evolved and migrated to the top of the head, the neural pathways serving sense of smell may have been nearly all sacrificed. Similarly, although at least some cetaceans have taste buds, the nerves serving these have degenerated or are rudimentary.

The sense of touch has sometimes been described as weak too, but this view is probably mistaken. Trainers of captive dolphins and small whales often remark on their animals' responsiveness to being touched or rubbed, and both captive and free ranging cetacean individuals of all species (particularly adults and calves, or members of the same subgroup) appear to make frequent contact. This contact may help to maintain order within a group, and stroking or touching are part of the courtship ritual in most species. The area around the blowhole is also particularly sensitive and captive animals often object strongly to being touched there.

The sense of vision is developed to different degrees in different species. Baleen species studied at close quarters underwater—specifically a grey whale calf in captivity for a year, and free-ranging right whales and humpback whales studied and filmed off Argentina and Hawaii—have obviously tracked objects with vision underwater, and they can apparently see moderately well both in water and in air. However, the position of the eyes so restricts the field of vision in baleen whales that they probably do not have stereoscopic vision.

On the other hand, the position of the eyes in most dolphins and porpoises suggests that they have stereoscopic vision forward and downward. Eye position in freshwater dolphins, which often swim on

their side or upside down while feeding, suggests that what vision they have is stereoscopic forward and upward. By comparison, the bottlenose dolphin has extremely keen vision in water. Judging from the way it watches and tracks airborne flying fish, it can apparently see fairly well through the air-water interface as well. And although preliminary experimental evidence suggests that their in-air vision is poor, the accuracy with which dolphins leap high to take small fish out of a trainer's hand provides anecdotal evidence to the contrary.

Such variation can no doubt be explained with reference to the habitats in which individual species have developed. For example, vision is obviously more useful to species inhabiting clear open waters than to those living in turbid rivers and flooded plains. The South American bottu and Chinese beiji, for instance, appear to have very limited vision, and the Indian susus are blind, their eyes reduced to slits that probably allow them to sense only the direction and intensity of light.

Although the senses of taste and smell appear to have deteriorated, and vision in water appears to be uncertain, such weaknesses are more than compensated for by cetaceans' well-developed acoustic sense. Most species are highly vocal, although they vary in the range of sounds they produce, and many forage for food using echolocation*. Large baleen whales primarily use the lower frequencies and are often limited in their repertoire. Notable exceptions are the nearly song-like choruses of bowhead whales in summer and the complex, haunting utterances of the humpback whales. Toothed species in general employ more of the frequency spectrum, and produce a wider variety of sounds, than baleen species (though the sperm whale apparently produces a monotonous series of high-energy clicks and little else). Some of the more complicated sounds are clearly communicative, although what role they may play in the social life and "culture" of cetaceans has been more the subject of wild speculation than of solid science.

* echolocation: the perception of objects by means of sound wave echoes.

24	答案: flying fish 注意题目中What (什么。答案为名词, 一种事物)。原文第四段第四句中tracks = 题目中follow。
25	答案: clear open waters 注意题目中Which type of habitat (哪一种栖息地)。原文第五段第二句中more useful = 题目中related to good visual ability。

26

答案: acoustic sense/hearing

注意题目中Which of the senses (哪一种感知)。按顺序原则应该填hearing或F段首句中acoustic sense。

(第19、22题为难题)

*该题型解题技巧请参考第4回。

填图题

填图题是针对原文中描述事物工作原理、工作流程的段落文字出题。其实它和雅思写作Task 1中的流程图题是一个互逆的过程。阅读是文字到图表,写作是有图表,让你写文字。

填图表题要注意三点:

① 因为原文中各部件工作原理会集中描写,所以答案有集中性特点。

答案常集中

② 图表题先以简单题作为突破口,要仔细观察图表特点判断哪道题简单。

Collecting Ant Specimens

...

Many ants are small and forage primarily in the layer of leaves and other debris on the ground. Collecting these species by hand can be difficult. One of the most successful ways to collect them is to gather the leaf litter in which they are foraging and extract the ants from it. This is most commonly done by placing leaf litter on a screen over a large funnel, often under some heat. As the leaf litter dries from above, ants (and other animals) move downward and eventually fall out the bottom and are collected in alcohol placed below the funnel. This method works especially well in rain forests and marshy areas.

All but one of the blind subjects assigned distinctive motions to each wheel. Most guessed that the curved spokes indicated that the wheel was spinning steadily; the wavy spokes, they thought, suggested that the wheel was wobbling; and the bent spokes were taken as a sign that the wheel was jerking. Subjects assumed that spokes extending beyond the wheel's perimeter signified that the wheel had its brakes on and that dashed spokes indicated the wheel was spinning quickly.

最后重申，我们一直主张英语学习应以语言基本技能的提升为根本。即使考生通过各种方式手段获得了雅思高分，但在将来的留学生活中考生要依赖的不是雅思的分数，而是雅思分数所代表的英语语言能力。了解对手的招数是好的，但修炼提升自己的内功招数才是王道正宗。

真经流派

在文化传播领域属于跨文化交流；从教学法上定义属于针对性训练；按照测试学理论属于考前有的放矢的科学准备；而从实践经验上说，贯穿了丰富的经验和深厚的底蕴。

学过总纲 • 考试不慌 • 背过考点 • 提笔就填 • 做过真经 • 一战搞定

真经体系

总纲 听说读写四项均有“总纲”，讲解命题规律、备考经验、自学心法；高度凝练，具有战略指导意义。

真经 为历届真题及答案大全，源自题库，实战分析，强化训练，是经典实战演练手册。

考点 对于听力和阅读这样的“客观题”，均配有独门“考点词”。归纳考点，揭秘答案，浓缩经验，出奇制胜。
