一句到底，一分钟

Advertisement

To be frank, watching advertisement is not my thing because I find it distracting and annoying, especially when I'm in the middle of something. For instance, when I watch movies, I really don't like to see some ads since they usually interrupt my experience of enjoying the movie as a whole, pretty much every time.

Music

I'm really fond of listening to music like pop music because I find it very delicious to my ears. For example, I simply love its simple melody and punchy beats, and so I always play a song or two every time when it comes to breaks between my classes. What's more, it's incredibly easy to sing along, so it's very contagious, and I find it easy to share the music with others. As far as I can observe, most people would choose singing pop songs as a popular activity, especially on some special occasions like parties and celebrations.

Travelling

Do you like travelling?

How often do you go travelling?

Where do you usually travel?

How do you feel when you are travelling?

Do you prefer travel alone or with friends and family members?

I'm really into traveling because I find it a great way to unwind. But since I'm a busy student, I don't travel very often, maybe just once or twice a year, when it comes to school holidays. Having said that, my go-to place for travel is coastal cities, especially the ones in the south, like Sanya, Zhuhai, etc. The reason is that the weather there is sunny and mild almost all year round, regardless which season. Therefore, it's a great place for a northerner like me to escape from the cold in winter. Honestly, I find travelling with friends and family members more fun simply because there are people around you to talk to and share opinions, and traveling alone could be boring. For example, last year, I spent two weeks in Sanya with my family, and it was such a great opportunity for bonding and creating fond memories.

Chatting

Do you like chatting with friends?

What do you usually chat about with friends?

Do you prefer to chat with a group of people or with only one friend?
Do you prefer to communicate face-to-face or via social media?
Do you argue with friends or other people?

I'm fond of chatting with others, especially those who I get along well with, because, I don't know, I think it's just a fantastic way for me unwind. You know, I usually have a chitchat with my classmates during our breaks at school, pretty much every day during the week, and sometimes, maybe a couple of times a month, I would have video calls with my friends and relatives who live in other cities. Having said that, I find video calls such a great tool to keep in touch and communicate with others because not only can I hear their voice, but I can also see their faces and their surroundings, which makes it easy to get in sync between us. Frankly speaking, I do fight or have a quarrel over some matters with my friends and classmates from time to time, but normally it's healthy argument or heated discussion where we can think deeper and learn more about the matters and ourselves.

Movies

Do you watch movies?
How often do you watch movies?
What kind of movies do you like?
Do you prefer to go to a movie alone or with others?
Do you prefer to watch movies at home or in a cinema?
Do you want to be a movie star?

Yes/Sure! I'm really into watching movies because it's a great way to relax. For example, I'm a big fan of comedy movies. The reason is that I find them quite hilarious. When I watch them, I often find myself rolling on the floor laughing.

You know, I'm keen on watching movies because it's a great way to relax, to make me feel comfortable, and to temporarily escape from reality. For example, once, I watched a movie called Interstellar, which was one of the greatest sci-fi movies of all time. On top of that, I'm a big fan of drama movies, like the Pursuit of Happiness, which I find very touching and inspiring. You know, I usually watch movies in cinemas with my friends because the screen is huge, the sound is superb, and more importantly, it's an excellent opportunity to discuss about it with my friends afterwards when we have a meal together.

Musical instrument

Have you ever learned to play a musical instrument?
What musical instruments do you enjoy listening to the most?
Do you think children should learn to play an instrument at school?

Do you think music education is important to children?

Well, **I have to say that I'm not really into playing musical instrument, because** it didn't pique my interest. But I learned Chinese traditional calligraphy **when I** was in primary school. I went to this calligraphy class **on a regular basis, pretty much every weekend, for about two hours. It's a great way to** practice my patience and concentration, and more importantly, it brings perks to my grades at school.

Music education is a great way for children to develop their brains and skills. For example, in a piano lesson, not only can children learn how to use their fingers to play a tune, which is a good practice for their brain and coordination, they can also learn some extra knowledge, like the origin of the musical instrument, the story of the musician of the tune, and the genre of the music itself, which can broaden their horizons.

Transport

How do you go to work/school?

What means of transport do you use when going for a trip from your workplace/school?

Is driving to work popular in your country?

Do you think people will drive more in the future?

I hardly ever take public transport to go to school, maybe once or twice a month, because I'm living close to my school, about a 5-minute walk. If I lived far from school, I would take public transport like subway/underground/metro/train/tram/the tube/BRT (bus rapid transit)/ferry. The reason is that I find them quite convenient and economical, and more importantly, it's a great way to avoid traffic congestion and hence keep me punctual.

I'm not perfectly sure about if driving to work is popular in my country because I hardly ever drive, maybe only three or four times a year when it comes to holidays (like I said before, my place is close to my school). But I often see many cars on the road during the rush hour, so I guess that there are many people driving to work. I don't know why. Maybe it's more comfortable to be in a car than a bus or the subway.

As for the future, what I have in mind is that people will drive more for sure simply because private vehicles have become affordable, and so Chinese people have more access to cars but there could be some restrictions in some places, especially big cities like Beijing and Shanghai.
